

A block diagram of a system 10. The system is divided into three dashed-line regions. The left region contains a central block 12 connected to blocks 13, 14, and 16. Block 13 is to the left of 12, block 14 is below 12, and block 16 is to the right of 12. The right region contains a top block 24 and a bottom block 21. Block 24 is connected to block 21 via a vertical line with a zigzag break. A horizontal line with a zigzag break connects block 24 to a central block 18. Block 18 is connected to block 20 on its right and block 21 on its bottom. Block 20 is to the right of 18, and block 21 is below 18. The top region contains a block 1/2 connected to block 24 via a vertical line with a zigzag break. Block 1/2 is above 24. Arrows indicate signal flow: from 12 to 13, 14, and 16; from 13 to 12; from 14 to 12; from 16 to 12; from 24 to 1/2; from 24 to 18; from 18 to 20; from 18 to 21; from 20 to 18; from 21 to 18; from 1/2 to 24; from 24 to 12; from 12 to 18; from 18 to 12.
